

# PRIMA-FLEX

## INTRODUCING THE NEW PRIMA-FLEX FAMILY OF APPLICATORS

Designed with durability, flexibility, and reliability in mind to meet the unique needs and challenges of administering medication to ruminants. Durable enough to withstand the brunt of everyday use in a feedlot. Flexible in design to configure for the most effective administration of any size medication product. Reliable in performance and accuracy from the brand you've grown to trust. Whether you're injecting, drenching, or applying medication topically, Prima-Flex has each of your needs covered.

**Meet the new solution you'll turn to time and time again.**

### FEATURES/BENEFITS

**Quickly and easily converts** in seconds to line feed or bottle mount configuration so users may effectively administer medication from any bottle size.

**Available in three barrel sizes**, 10 mL, 15 mL, and 20 mL. This allows users to select the capacity that best suits their needs.

**New and improved design** allows users to easily access inlet and outlet valve components for cleaning and replacement.

**Selecting the medication dose** is made simple with select-a-dose technology; turn the dial until the dose appears in the dosage window and the dosage is set.

Shown: 15 mL Product # 379566

**Lightweight, ergonomic, and form fitting** to the hands of the user, Prima-Flex engages a strong handle spring to quickly disperse and refill even the thickest of medications.

# QUICKLY AND EASILY CONVERTS
